

## Quality Policy

We are committed to consider Quality as equally important as other business objectives. Beginning with a clear definition of customer expectations, we strive to consistently meet or exceed them. We adhere to all applicable standards and customer specific requirements and endeavour to provide processes that ensure we achieve this in order to build a robust and world class business.

In order for us to carry out our activities to achieve quality, we have a fully implemented management system in line with applicable statutory and regulatory requirements and we ensure effective communication of this policy to all employees and contractors of within our group.

We have set clear and concise objectives that are translated in Key Performance Indicators (KPI's). These ensure that we have a mechanism in place to continuously improve on Quality

We will conduct an annual management review to monitor the overall effectiveness and suitability of our quality Management System, including this policy, establishing and reviewing of objectives, and agreeing appropriate changes with senior management.

This policy will be implemented through the systematic application of good engineering practice and quality management to all activities, together with the active involvement and conscious improvement of all staff and contractors.
